HÄFELE

Maximising
the value of space.
Together.

KITCHEN SINKS & FAUCETS

www.hafeleindia.com

The first 100 years.

Dear Reader,

2023 marks a huge **milestone in the history** of our company. Häfele is now **one hundred years old**, and we are taking the opportunity of this extraordinary anniversary to pause and reflect intensively on the growth that's taken us from a small hardware store in the Black Forest (Germany) to a global company.

In addition to extraordinary people who have guided the company's fortunes with far-sightedness, what stood out prominently for us was our ability to forge **strong partnerships** that have been fundamental in shaping our progress and achieving the milestones we stand before today. We sought to build an ecosystem that fostered a sense of community, respect, and shared purpose and over the years, this approach has proven to be the cornerstone of our achievements. Together, we have weathered economic downturns, navigated shifting market trends, and embraced technological advancements.

Therefore, it wouldn't be incorrect to state that it has been **courage and optimism**, above all that have carried us as an organization through stormy times. These qualities have also defined Häfele from the very beginning and characterised the founders back in the day. The original 2-man business which was a specialist hardware store led by **Adolf Häfele and Hermann Funk**, has developed into a global company, Häfele SE & Co KG, with subsidiaries in **38 countries, 8,000 employees** and more than **1,50,000 customers**.

Standing on the threshold of the next phase of our journey, we realise that it was courage and optimism along with an **unwavering alliance with our employees, vendors, suppliers and above all our customers**, that enabled us to change continuously, to break new ground and not only to think ahead, but also to actively implement these forward-thinking ideas.

As we foray into the next 100 years, Hafele presents its future-oriented brand purpose (which will be at the very core of our strategic outlook) - **"Maximising the value of space. Together."** The new brand claim aims to consolidate our attitude, our competences, the developments inside and outside of our company and the strategic decisions we have made in the past years and decades. And as we transition between the first and second century, we aim to pour our collective experiences that have brought us here into a connected mould – our purpose, that will function as a starting point for a shared journey into the future and will act as a powerful compass for us.

Needless to say, we excitedly look forward to shaping this - perhaps new, different, surprising - future together with you!

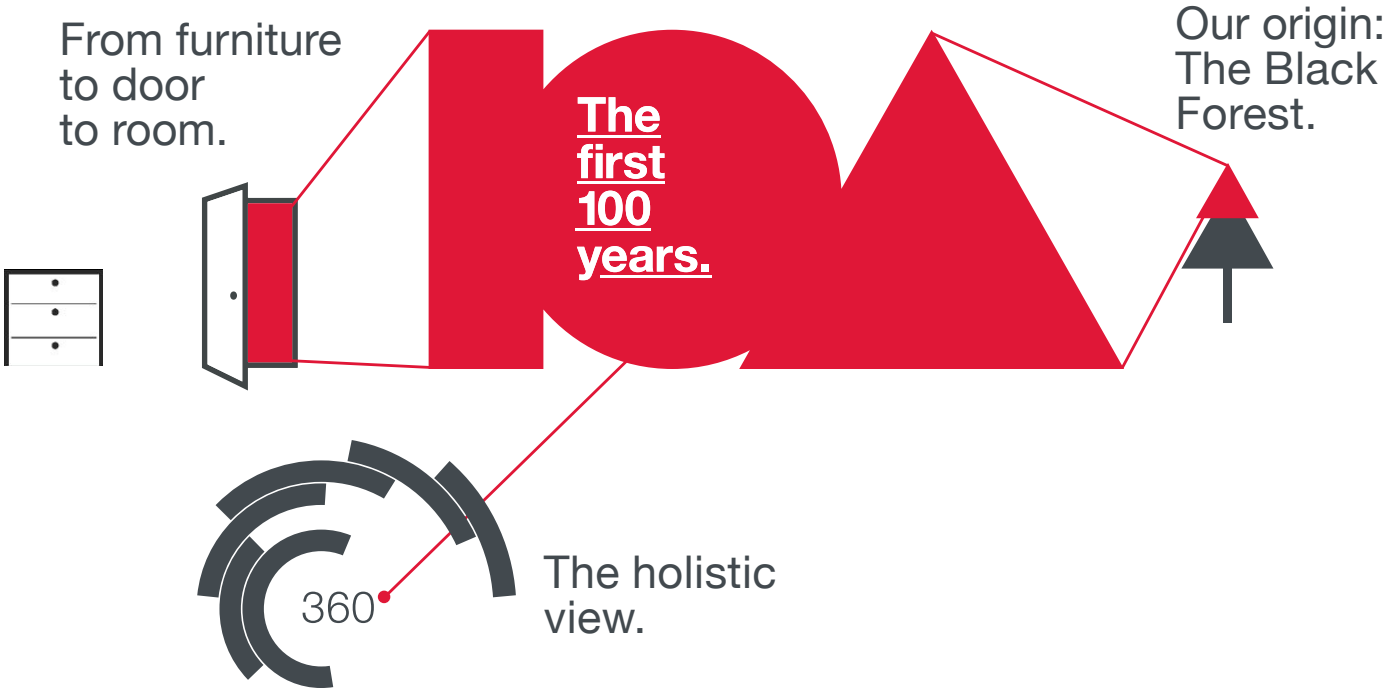

With Best Regards,

Frank Schloeder
Managing Director, Hafele South Asia

HÄFELE

THE PATH OF HÄFELE **THAT TRANSLATED INTO SYMBOLS**

For the 100-year anniversary of Häfele, we have expressed two things: The pride in the successful path that the company has taken up to today, and optimism that the path to the future will be just as successful because we have the courage to continuously reinvent ourselves. This is why the anniversary design is based on the roots of the company and is at the same time open and flexible. A modern forward-looking code that gives our ambitions a visual expression

The first 100 years.

HÄFELE

MAXIMIZING THE VALUE OF SPACE. **TOGETHER.**

In conjunction with its 100-year anniversary celebrations this year, that kicked off at Interzum 2023, Hafele unveiled a new purpose line **"Maximizing the value of Space. Together.",** which resonates strongly with us. We aim to strengthen our brand position in South Asia by emphasizing on the meaning of this purpose line, i.e. Hafele strives to provide the best of the best **(maximizing)** benefits **(value)** through its versatile solutions and services for different living and working spaces ranging from hotels, offices, institutes and homes as well as different interior applications like kitchens, living rooms & bedroom furniture, doors and interior partitions, wardrobes as well as furniture and room lighting. And this we strive to achieve in partnership **(together)** with all entities within our ecosystem from our suppliers, partners (Industry and Project), channels (distributors, dealers and franchisees), influencers (architects, designers, contractors and carpenters) right up to the final beneficiary i.e., our end customer.

In short, with our new purpose line we aim to co-create an environment for our endearing customers where they can enjoy the multiplied benefits of their living and working spaces.

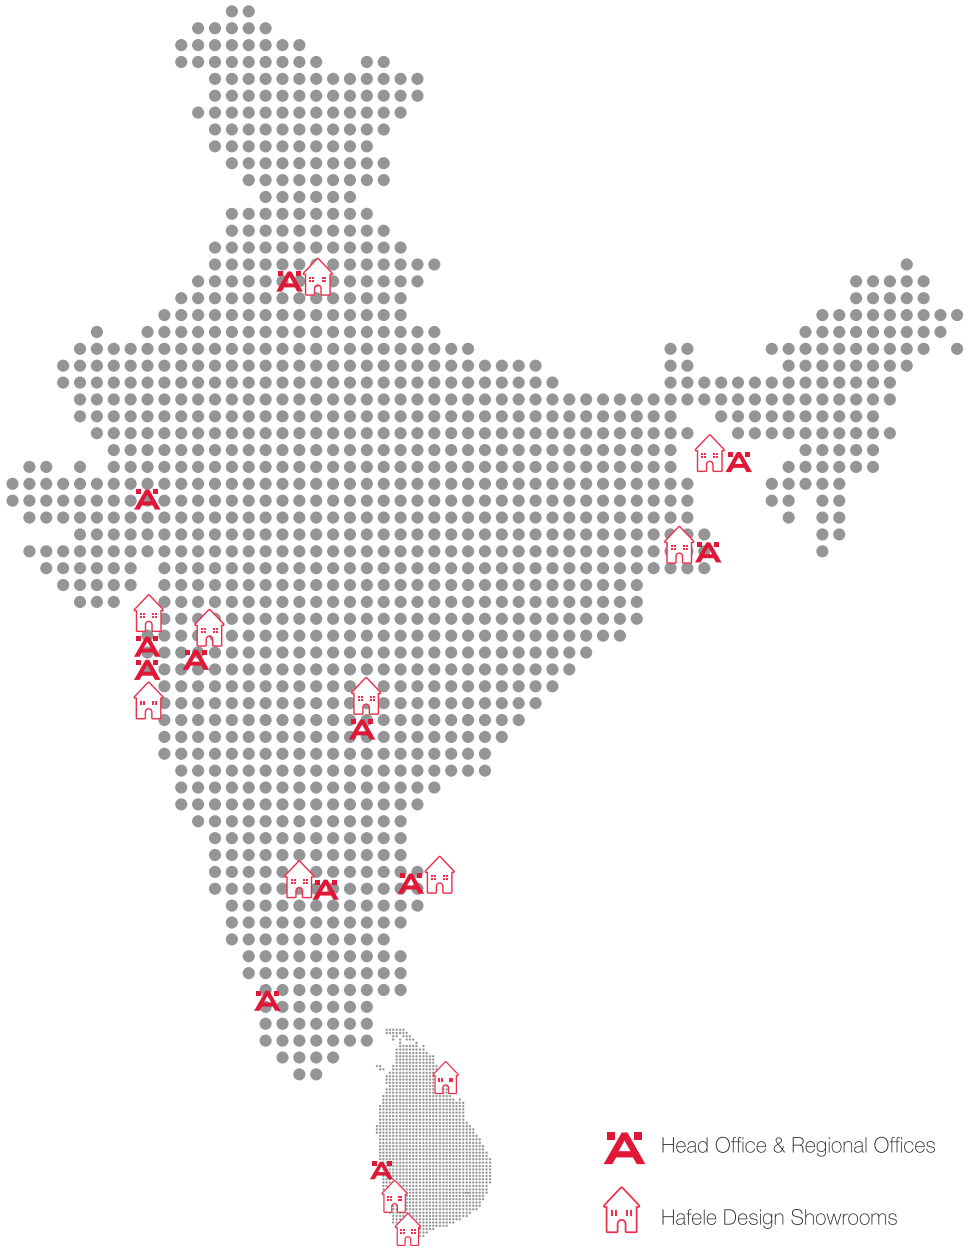

Hafele Worldwide

With its origin in 1923 in a small town named 'Nagold' from the Swabian region of Germany that nurses a passion for hardware technology, it is no surprise that Häfele has lived up to its roots through a successful presence in the architectural and furniture hardware industry for over 10 decades now. Today, Hafele's worldwide penetration includes 38 subsidiaries across Europe, America, Asia, Australia and New Zealand. With these subsidiaries and numerous other sales organisations, Häfele operates in over 150 countries. The Häfele headquarters, 4 manufacturing units and 10 sales offices are located within Germany; while 1 manufacturing unit is located at Budapest, Hungary. The company also owns one of the largest and most sophisticated warehouses in its home country. The Häfele worldwide workforce is empowered by a base of over 8100 employees.

The group services over 150,000 customers across the globe through its extensive range of hardware products and a comprehensive logistics system. In addition to this, Häfele also provides consultative services to its customers, educating and advising them about buying the correct hardware as per their requirements. With this level of market penetration and ability to handle worldwide demand, it comes as no surprise that the company is an authority in the segment of home interior solutions; what is pleasantly surprising, though, is that in spite of its size, Häfele still remains a family owned and run business with a unique, friendly and value-centric work culture which is strongly followed among all its subsidiaries.

Hafele India

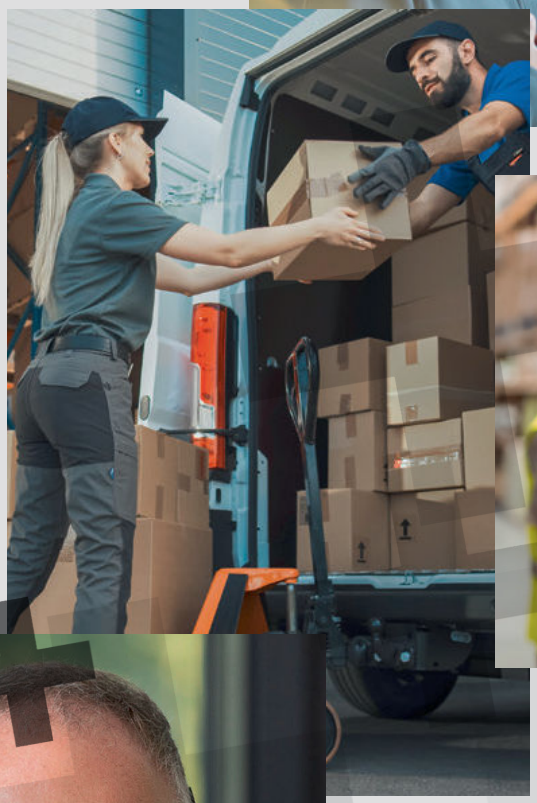

Häfele India is a wholly-owned subsidiary of the Häfele Global network and has been operating in India since 2003. The ability of the company to understand the diverse Indian market has made it an authority in the field of architectural hardware, furniture and kitchen fittings and accessories. The company also has a strong presence in synergized product categories namely Home Appliances, Interior Lighting, Water Solutions and Surfaces catering to the focused demand from these industries.

The subsidiary has a strong nation-wide presence with offices in Mumbai, Pune, Ahmedabad, Bangalore, Chennai, Hyderabad, Cochin, Delhi and Kolkata. It has full-scale operations in Sri Lanka and Bangladesh with Regional offices and Design Showrooms in both the countries; and has also spread its operations to other regions of South Asia including Nepal, Bhutan and Maldives.

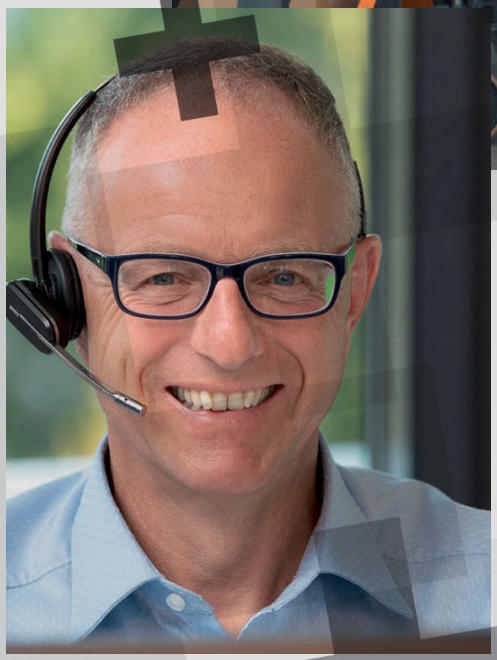

Häfele's design showrooms are hubs of international home interior trends and cutting-edge designs presented in a world-class environment, where customers can see home solutions in their inherent applications. These showrooms function as a one-stop-shop for all home interior and improvement needs - from providing in-depth technical advice to kitchen and wardrobe designing services through a team of experts stationed at the showroom.

Häfele India services its customers with a base of 1500 employees, a well-networked Franchise base of over 180 Partners along with over 500+ direct dealers and 90+ distributors who in turn cater to over 12000+ sub dealers. The subsidiary has a sophisticated Logistics centre in Mumbai along with distribution centres in Delhi, Bangalore, Kolkata and Colombo respectively.

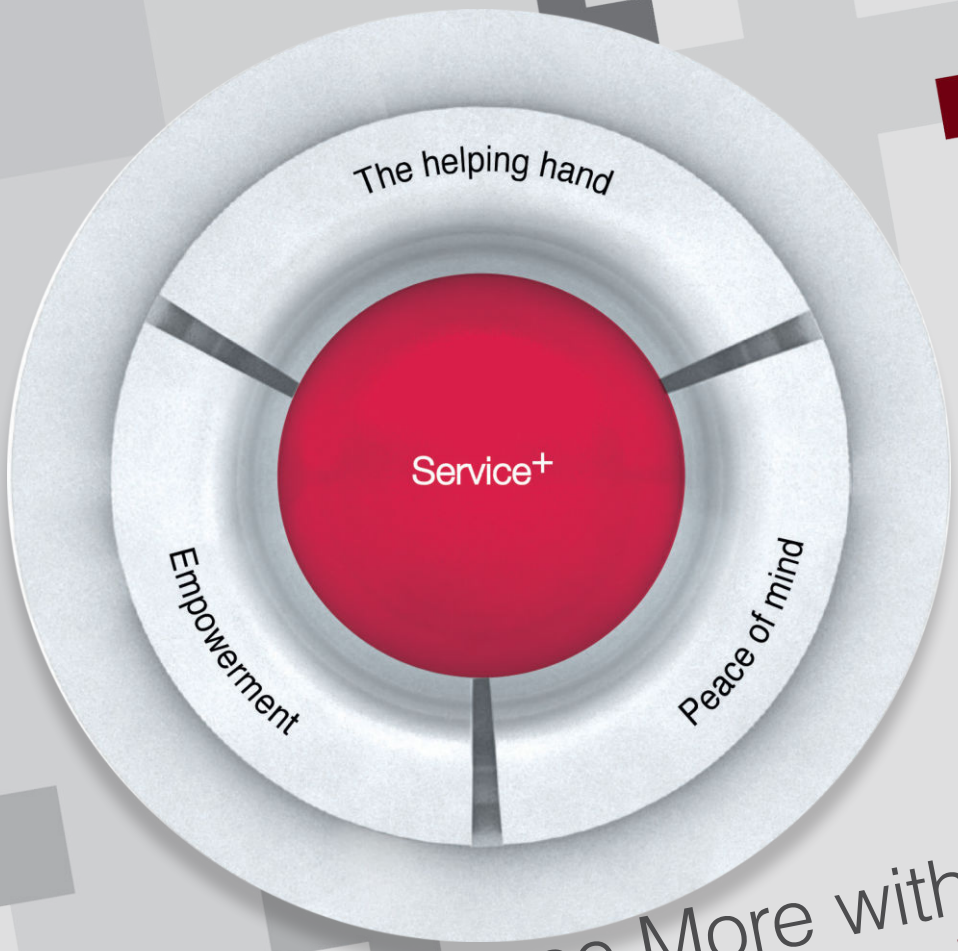

Experience More with Service+

Our customers' working environment is becoming increasingly complex and their market is becoming ever more demanding. This drives our motivation to do everything in our power to help our customers be successful. And to demonstrate that Häfele is the right partner in these challenging times, we want to accompany our customers throughout their entire business process and give them added strength in every phase of their business. We don't just want to sell our products, we also want to provide the highest level of service.

We have now divided our services into two categories: Standard Services which we provide to our customers as a matter of course when they choose our products. For example, a high availability of our goods and punctual delivery. And then there is Service+ which constitutes of services that give our customers considerable added value in terms of building expertise, increasing productivity or providing individual customised solutions. These services require a considerable amount of time and effort to develop and implement and are designed to enable our customers to regard them as worthwhile investments.

The aim is to create solid long-term foundations for our comprehensive service promise and to make Häfele an indispensable partner for our customers. The focus here lies not so much on us and on what we do – but rather, on the benefits derived by our customers. We want to empower them with opportunities to develop and expand their skills – both as masters of their trade and as entrepreneurs. We want to support them in the planning and realisation of their projects and relieve them of as much work as possible, thereby providing them with a helping hand to use their most valuable resource – time – as efficiently as possible. And we aim to give our customers peace of mind and the assurance that even after the end of a successful project completion, we will continue to be there for them as a reliable partner, shouldering responsibility.

The Pillars of Service+

In order to support you as comprehensively as possible, we have assigned the Plus Services to individual stages of your work process in a total of four themed pillars. We start with the transfer of knowledge and accompany you via planning and production to installation and maintenance.

Empowering customers with

Service+ Knowledge

Includes service offerings that provide inspiration and expertise to our customers about the Häfele product range. Through these, we enable our customers to use Häfele products profitably and at the same time remain at the cutting edge of technological development. One example of this is the Häfele Academy, which imparts knowledge about complex products and new technologies to our customers via seminars and trainings.

Providing a helping hand to customers with

Service+ Planning & Customised

Includes service offerings like space, design planning and customisations that make life easier for our customers and support their design vision. An example of this is Hafele's Lighting Design Service which helps our customers curate a lighting plan, following a customised approach, that enhances and brings out the true functionality of the interior space as per requirement.

Lending a “Peace-of-mind” experience through

Service+ Assist

Includes service offerings that provide support and assistance to our customers, whether digitally or on site. An example of this is the complete assembly and installation service for more complex and maintenance-intensive products done by our Meister certified and trained technicians.

ENDULGE IN THE PURITY OF DESIGN AND TEXTURE

Kitchen sinks that define unbeatable standards of design, functionality and maintenance.

Our range of **SILGRANIT™** kitchen sinks from BLANCO, Germany is backed by 60 years of experience and research in market knowledge, engineering proficiency and latest technologies, just so we can adapt it to your likeness and needs. The SILGRANIT material is a unique and patented technological break-through that combines the hardest elements found in natural granite, acrylic, ceramic and colour pigments to give you the result of a kitchen sink surface you may have never seen before.

Today, BLANCO has produced more than 40 million sinks, and is recognized as a world leader in quality, innovation and unsurpassed service. Long gone are the times when a sink was merely used for function. These days, it can be the muse for a kitchen – or perhaps an entire home. Because of BLANCO's dedication to quality, every sink is inspected multiple times before earning the BLANCO name, it's just a part of their commitment to craft. BLANCO commits itself to respect ethical business principles and since 1994 has been a member of the Caux Round Table (CRT), an international network of principled business leaders and companies working to promote a moral capitalism

BLANCO turns a sink into a sink centre. Tips for making the right choice

Optimum space utilisation for more comfort
BLANCO offers solutions for any size of sink cabinet. A cabinet width of 60 cm is ideal for sinks with a main and additional bowl.

Ergonomics and functionality
The main and additional bowls and accessories are designed to match each other perfectly. Comfort solutions – such as the AXial concept – help to achieve efficient working.

Cleaning made easy
The surfaces of sinks and mixer taps are wonderfully easy to clean. Special materials help to repel dirt and water.

Mixer taps by BLANCO
BLANCO offers a wide selection of designs of high functionality. Certified in accordance with the strict quality criteria of independent test institutes, they meet the highest requirements for safety and hygiene.

Material and colour add highlights
The right combination of sink and mixer tap creates an ambience that matches any home living style.

BLANCO EasyCare – Care is more than a superficial matter

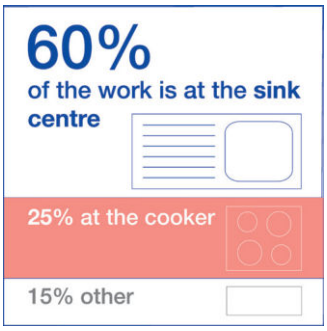

BLANCOCARE
Care products from BLANCO are specially designed to suit the respective materials. All conceivable problems can be dealt with - from scratches to limescale deposits and fingerprints to rust, metal abrasion and discolouration.

YEAR 10 WARRANTY

BLANCO WARRANTY
offers 10 years* warranty on manufacturing defect or faulty workmanship on BLANCO products.
* T & C apply

Simply quicker to clean

An independent survey proves it:
the heart of every kitchen is the sink. Over 60% of the work is done here, despite dishwashers! This creates a great deal of dirt, of course.
And this must be cleaned away. But this costs time.
This is a great deal to expect but, at BLANCO, it is precisely this which is the driving force behind our developments.
We want to make kitchen chores as simple and as easy as possible.

BLANCO EasyCare is the name behind this concept, a superior product concept:
Sinks, which are simply easier to clean!

BLANCO sinks are the right choice for:
- **the degree of work facilitation**
- **the long term value of the kitchen**
- **the pleasure from and in the kitchen**

SILGRANIT™

Easy to maintain and long-lasting
Thanks to the excellent material properties, SILGRANIT™ offers an ease of care and **level of resistance that has never been offered before** for coloured composite sinks.

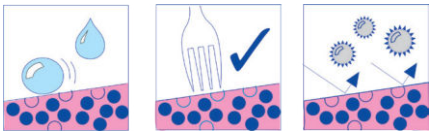

Unsurpassed scratch resistance
Unsurpassed resistance to breakage
Unsurpassed heat-resistance to 280˚C

SILGRANIT™ is:
100% suitable for food use
100% acid resistant
100% non fading

Unique colour fidelity
There is a choice of **six delightful colours with the identical surface condition** in all, and all specially designed to match the BLANCO taps.

Material properties
The stony-silky, very finely pored and closed surface create a soft stone-like character that is soft to touch.

New and hygienic: The concealed C-overflow™ enhances the elegant look.

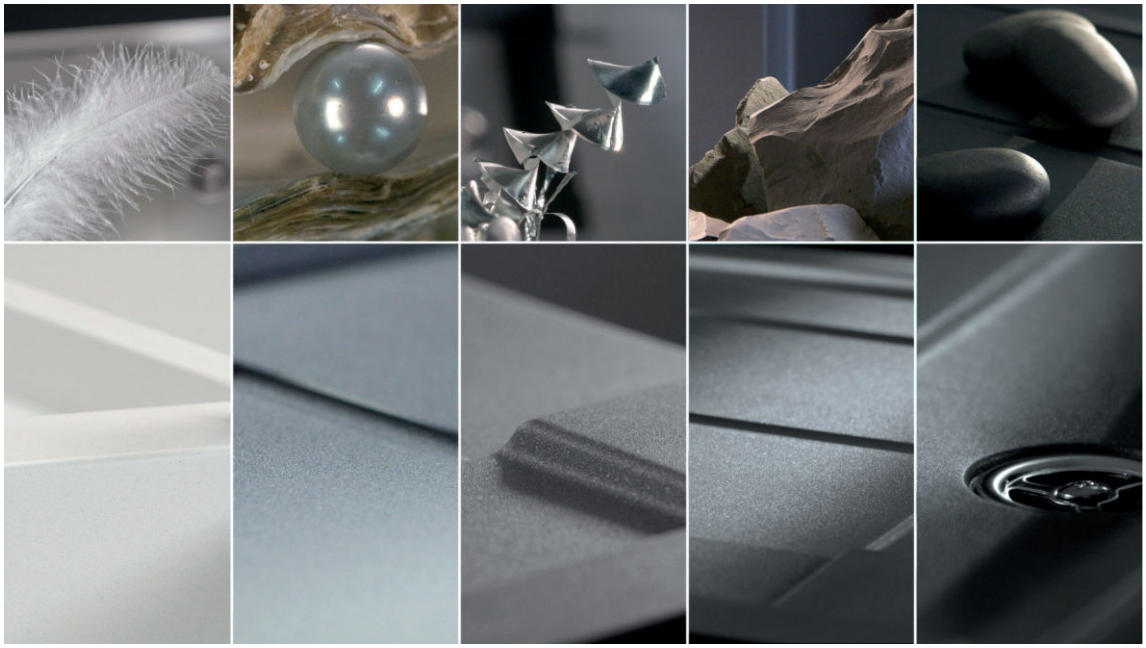

Perfect interplay: Newly designed accessories for optimum steam preparations at the sink.

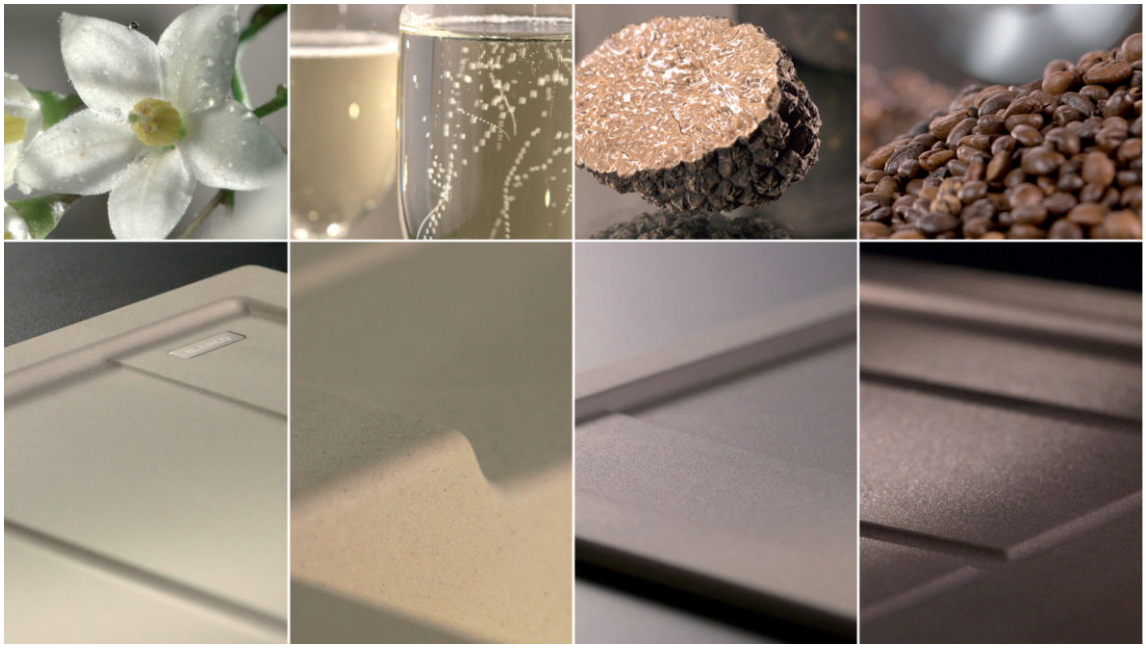

HÄFELE

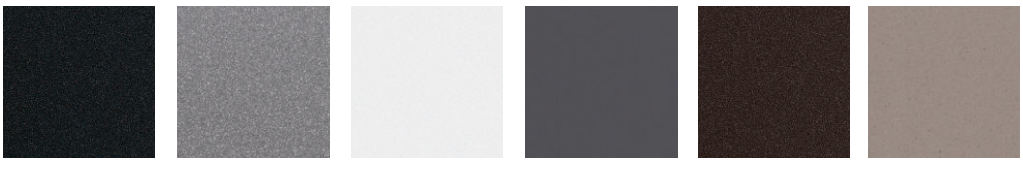

Hafele's Range of Blanco Sinks comes with a unique colour fidelity and a host of contemporary colours, with identical surface conditions, specially designed to match the BLANCO taps

Faucets That Redefine Ergonomics

Sleek, clean lines or sinuous shapes, we have the competence in faucets to match the elegance of your sink centre.

Equip your sink centre with a faucet which matches the design of your kitchen. BLANCO faucets incorporate a high quality mechanism, are equipped with a wide variety of additional functions and make all your chores much easier – from washing salad to cleaning pans. Make the most of the high degree of creative freedom they offer and combine the materials and colours of the SILGRANIT™-look or ceramic-look taps with the matching sinks.

FEATURES:

- Our faucets are extensively tested and certified, they thus provide maximum safety in terms of health and hygiene
- Created with certified quality materials; all water conducting parts of the faucet have been tested
- Our faucets provide longevity in use thanks to the long- life ceramic disc cartridges which provide for a precise adjustment of the water amount and temperature

Put your trust in BLANCO mixer taps.

Quality for the sake of your health.

Avoid risks to your health.

Untested taps can significantly exceed the maximum permissible value for substances which endanger health. BLANCO taps are extensively tested and certified. They thus provide maximum safety in terms of health and hygiene.

Clean water is our contribution to your health.

BLANCO proves its high sense of responsibility towards people and the environment in many ways, not only by exclusively using certified quality materials in all water-conducting parts of BLANCO taps, but also by continuously monitoring them by means of voluntary tests.

The advantages for you:

- a good feeling every day about the hygiene and health protection for the whole family
- confirmed safety when buying taps
- durable products with high quality

BLANCO taps: seal of approval for safety and hygiene.

Blanco has the technology and hygiene of its taps voluntarily tested according to the stipulations of the German drinking water regulation and certified by the DVGW Cert GmbH (Certification body of the German Scientific and Technical Association for Gas and Water e.V.).
With this certification, BLANCO taps provide one of the highest qualities currently available in the Indian market.

The voluntary certification by the DVGW is BLANCO's documentary proof that requirements for the protection of drinking water are being observed.
Before the certification takes place, the technology and hygiene of a range of taps are subjected to a large number of individual tests by various, independent institutes.
The following criteria are an essential part of these tests:

- safeness of the materials used (all materials coming into contact with water are tested for hygienic properties and constituents which can present a health hazard.)
- durability in hot-cold permanent use
- flow rate
- intensity of water noise

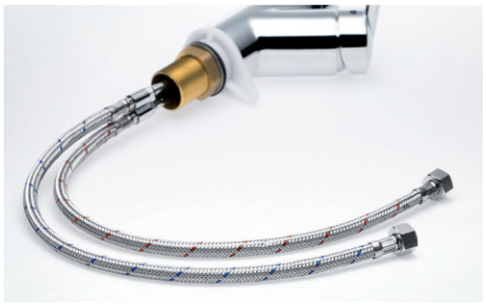

The patented Neoperl cascade reduces lime-scale and provides an even flow of water.

The integrated check valve keeps used water away when the spray is in use.

Elastic silicone nubs keep the spray free of limescale, and are easily cleaned just by rubbing with a finger.

Because they are so long, the flexible connection hoses are ideal even for difficult conditions.

Long-life ceramic disc cartridges provide for a precise adjustment of water amount and temperature.

Installation examples - undermount, flush-mount and flush undermounted installation

Undermounted

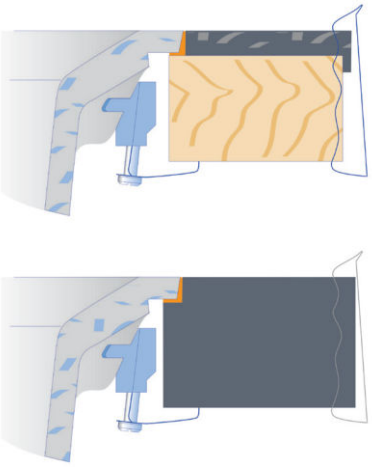

All BLANCO inset sinks can also be installed from below in non-hygroscopic worktops made of natural stone or composite.
The sink is tightened against the worktop below the cut-out by means of special retaining brackets. This requires the mounting of a special dowel on the underside of the worktop.
The rim of the sink and the lower edge of the worktop are sealed with sealant.

Please note:
The control elements' accessibility and the ease of cleaning can be affected by undermount installation.

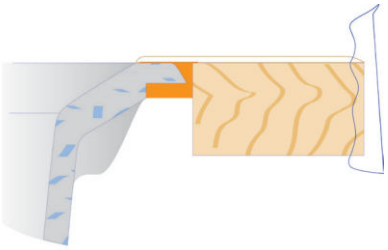

Flush mounted

The flush mounting procedure involves inserting the sink from above. Only special models with a specially designed rim are suitable for this.
For laminated worktops, the sink is drawn into a supporting profile which is either screwed, bonded or integrally cast into the worktops cut-out.
Where the worktops are made of granite or composite, the sink is drawn onto a recess milled into the work surface.
In both cases, the sink lies in an all-round bed of sealant to ensure durable, secure bonding of sink and surface and prevent moisture seeping in.

Flush undermounted

The procedure for flush undermounting involves inserting the sink from below. All BLANCO sinks are suitable for this.
For laminated worktops, the substrate around the cut-out is completely removed by milling from below down to the top layer of the worktop. The rim of the sink is bonded against the laminate layer and the sink is permanently bonded with the worktop from below by filling with a cast resin.

This articulated product range, carries modern single lever mixers in a young and functional design along with the most classic fashion line. Made in Italy, these taps are the result of long-term investigation and experience thereby ensuring quality and safety for the customer.

ITALIAN FASHION REFORMS YOUR KITCHEN

Kitchen Mixers from Italy that spell class and elegance with uncompromising functionality.

We bring to you our exclusive range of kitchen faucets from Italy. Backed by more than 40 years of investigation and experience, this range is a synonym of quality and safety for you, our customer. Available in classic Italian designs or modern contemporary lines, you can't miss your favourite pick from this range.

Features:

10 Years Warranty

Long Operational Life:
These taps are completely manufactured in Italy and are the result of long-term investigation and experience, synonym with quality and safety for the customer. With this body of experience and the 10 years warranty provided by Häfele, these taps guarantee a long operational life.

Perfect Water Flow:
Häfele's Italian Kitchen Taps have a flawless stream quality even under difficult flow conditions

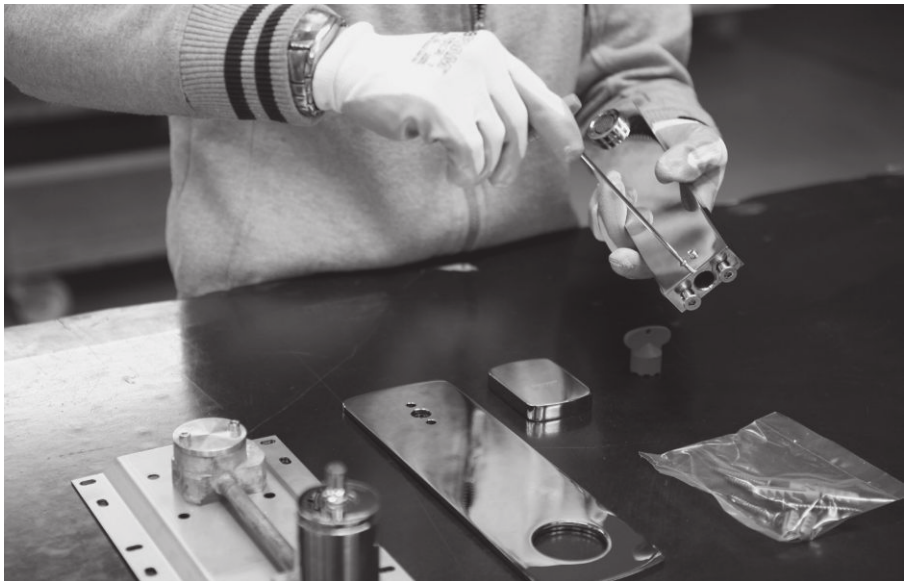

Quiet Operation: These Kitchen Taps have a very low operational noise level thus accounting for maximum ease and comfort to the customer

Vandal Resistant Aerator:
The Italian Kitchen Taps have vandal resistant aerators which cannot be removed without using a special key, supplied with the product

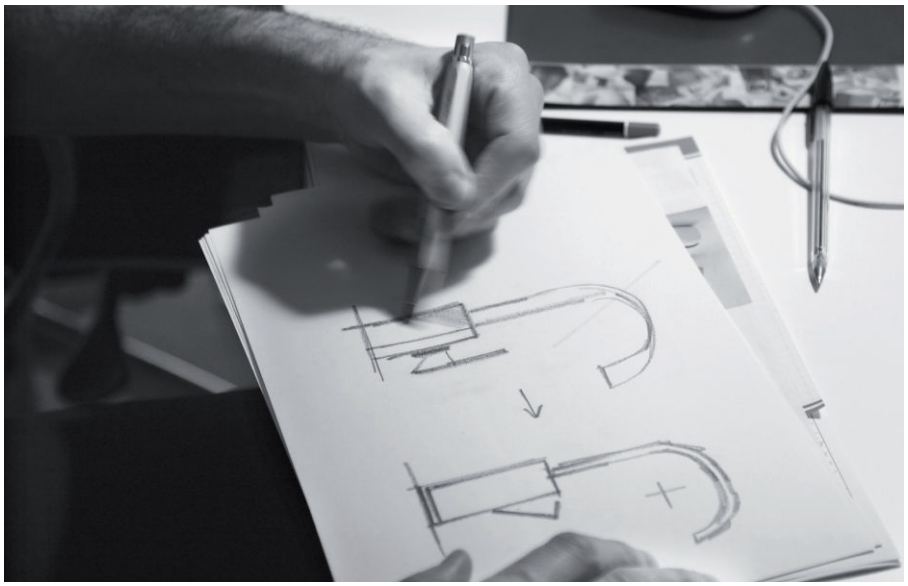

Water Sense Technology:
These Taps are integrated with a Water Sense Technology which helps save 20% more water than similar products in the market

Smart Lime Cleaning:
The Italian Kitchen Taps by Häfele have an Anti-Lime pure water outlet design for their aerator which reduces the possibility of lime formation & increases the maximum lifespan of the faucet aerator

Technology

WRAS APPROVED PRODUCT

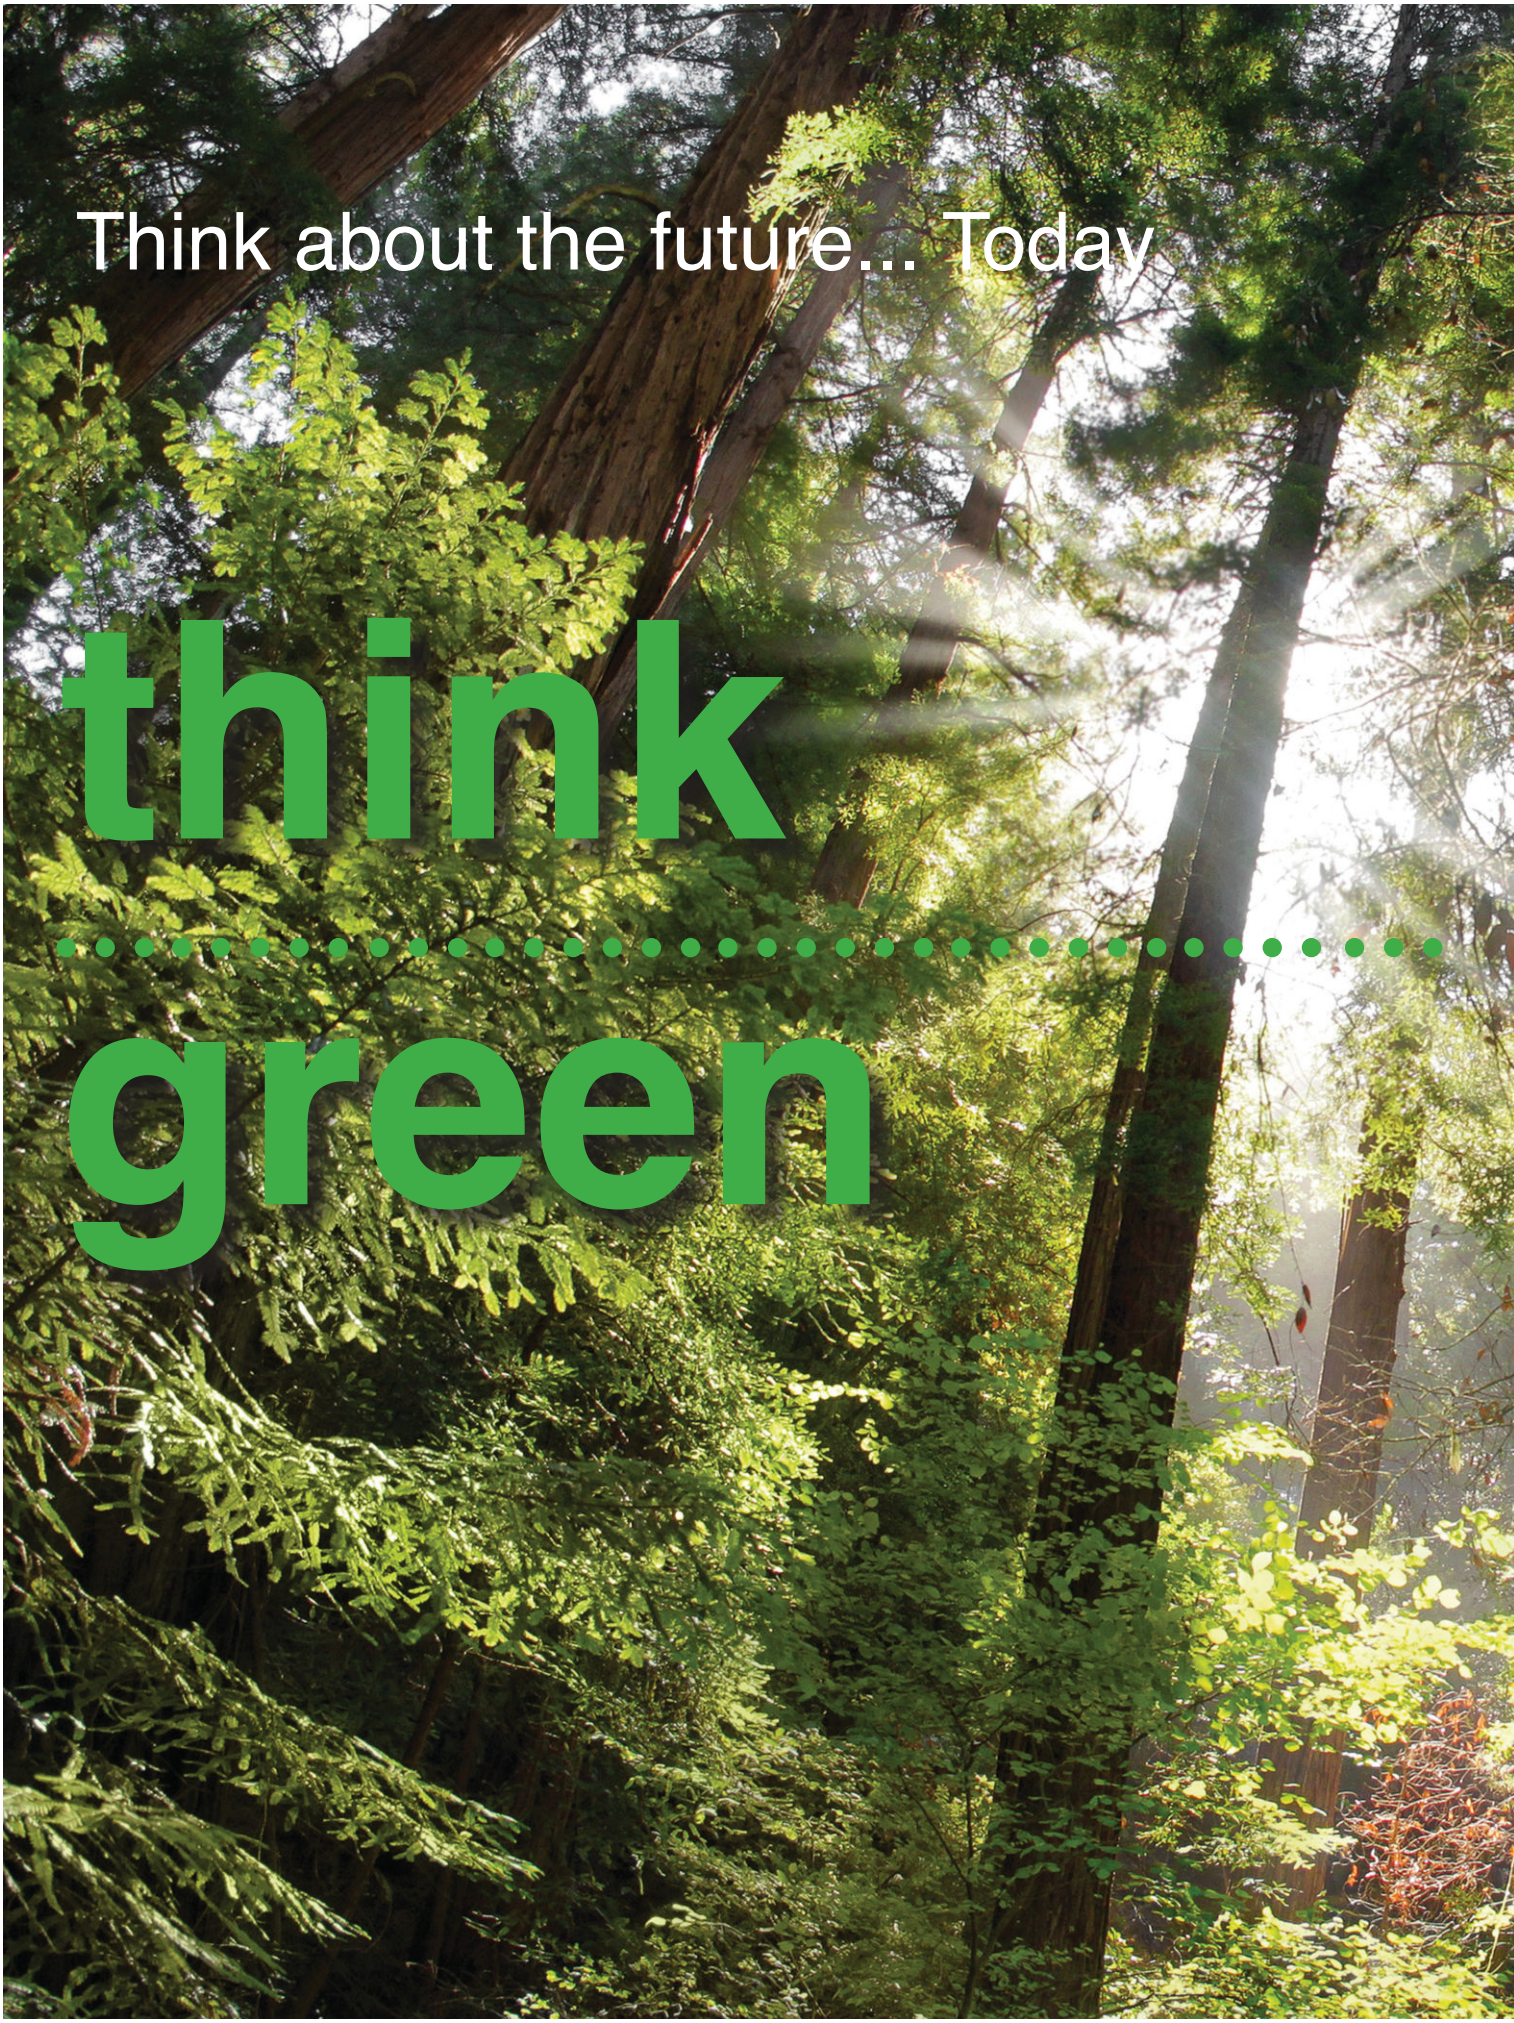

CSICERT UNI EN ISO 9001

Technology

Think about the future... Today
think
green

How **to save** water?

Consumptions can be reduced and it's easier than what you think.
Avoid wasting.

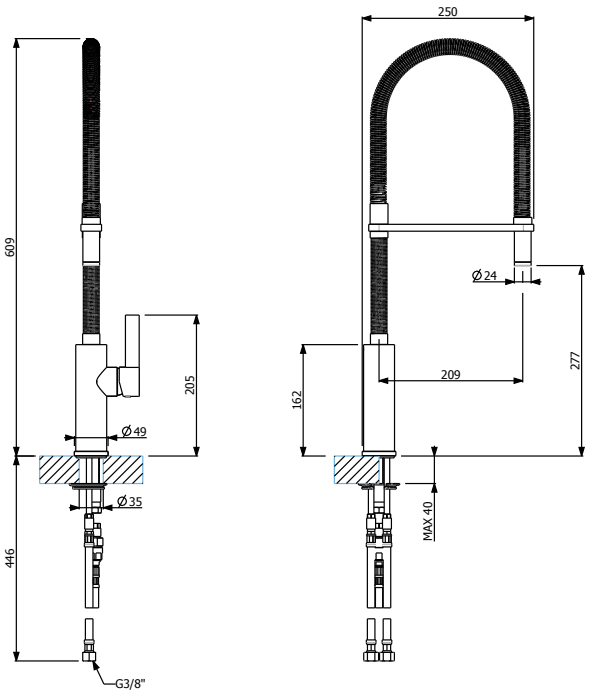

For example, use full load washing machine and dishwasher, water the plants at evening when temperature is lower, do not leave taps open unless necessary (letting the water run as you brush your teeth)...

Use low water consumption systems.
Flow reducers, thermostatic taps, aerated taps and low consumption appliances together with a water use attentive and rational, guarantee remarkable **drinking water saving up to 20-30%.**

STEELART
Experience something special

The moment you see them, some things radiate an aura that you can't quite describe. Although they clearly outshine everything around them, they do so in an understated manner. You can sense the hours of craftsmanship and every thought invested in their creation. All stainless steel sinks in the STEELART high tech manufacture are produced in small-scale series with loving attention to detail, ensuring that all products meet the highest standards of quality and exclusive exceptional design.

We invite you to discover and experience the world of SteelArt - The minimalist, beautifully crafted range of our hand-made stainless steel bowls and sinks that add very special accents in your kitchen.

Excellent variety

SteelArt offers an unimagined choice of bowls and sinks in perfectly matched designs. Be it the eye-catching bowls with strict right-angled geometry, or the elegant sinks with the minimally rounded corners. SteelArt blends stylishly with any kitchen environment. Discover the highlights in our exclusive stainless steel collection.

This product catalogue takes you through the exclusive range of bowls and sinks, whether in the flushmount look with a 1 mm rim or for undermount installation.

The Material – Stainless Steel

Stainless steel is often called the preferred material of discerning product designers and kitchen planners. Its unique material properties make this elegant material the first choice for the highest standards in high-end and exclusive designs. But what exactly is behind this all-rounder?

We have compiled the most relevant information for you in this piece:

Recyclable: Stainless steel is a natural, environmentally friendly material that is 100% recyclable. This means that all items made of stainless steel can go back into the production of new materials at the end of their life cycle.

Corrosion-resistant: BLANCO uses the highest stainless steel quality that consists mainly of iron (72%), chrome (18%) and nickel (10%). This composition makes it resistant to corrosion.

Anti-rusting: Stainless steel does not rust. Any rust marks that appear on the surface are from other sources. This rust is an oxidation of deposited foreign materials.

Self-renewing: Stainless steel constantly renews itself. In fact, it is said to have a self-healing surface, also called the passive layer. If the surface is damaged, oxygen helps it to renew itself. This is always of benefit to the material in daily use.

Durable: Thanks to the zoning of the passive layer, there is no need for corrosion protection. As a consequence, stainless steel retains its value and brilliance for decades.

The Finish - Stainless steel satin polish

Polished stainless steel delights with its glossy look. The classically timeless surface in satin polish blends perfectly with an aesthetic design. The material is made from the purest stainless steel, and differs from other stainless steel surfaces in its linear brushed finish. The very fine polish on the surface leaves the stainless steel feeling particularly smooth.

Cleaning And Care (Stainless Steel Satin Polish / Satin Matt).

1. Deep clean (satin polish finishes only):

We recommend cleaning and maintaining the surface with BLANCO POLISH every 1-2 weeks.

BLANCO POLISH makes daily cleaning much easier, and removes heavy dirt and limescale deposits. It seals the surface, giving it a self-cleaning effect, and also removes minor signs of use.

BLANCO POLISH:

- Removes scratches
- Removes rust and stains
- Water just rolls off the surface after use
- Prevents finger prints and other marks and dirt from settling
- Leaves a silky-matt shine

BLANCO STEELART care set:
1 x BLANCO microfibre cloth
1 x BLANCO POLISH
1 x Vileda sponge, non-scratch

2. Daily cleaning: All that is required for daily cleaning is a soft sponge or damp microfibre cloth and normal commercial cleaning detergent. You can also use vinegar or lemon cleaner to remove limescale.

BLANCO household tip: Clean with vinegar water (20% vinegar, 80% water) or with lemon juice diluted in water.

Advantages of Having BLANCO STEELART in your Kitchen

- **Optimum space utilization for more comfort:**
  BLANCO offers solutions for any size of sink cabinet. A cabinet width of 60 cm is ideal for sinks with a main and additional bowl, but there are also numerous models for other spatial and planning situations.
- **Ergonomics and functionality make everything easier:**
  The bowls and accessories are designed to match each other perfectly and make work-sequences flow smoothly.
- **Comfort in a system:**
  It is the perfect interplay between sink,mixer tap, waste system and accessories that creates a functional sinkcentre.
- **Material and colour add highlights:**
  The right combination of sink and mixer tap creates an ambience that matches any home living style.
- **Mixer taps by BLANCO:**
  BLANCO offers a wide selection of designs of high functionality. Certified in accordance with the strict quality criteria of independent test institutes,they meet the highest requirements for safety and hygiene.
- **Cleaning made easy:**
  The surfaces of sinks and mixer taps are wonderfully easy to clean. Special materials help to repel dirt and water.

BLANCO STEELART
Exclusivity in stainless steel

The exclusive BLANCO FLOW inset sink is in a clear, balanced design that instantly soothes the eye of the observer.

The innovative stainless steel BLANCO Durinox® surface appeals for its particular hardness that makes it particularly resilient to scratches.

BLANCO STEELART.

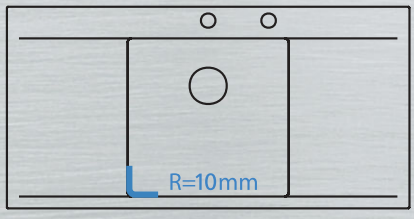

Exclusive variety for all installation methods

The design-based inset programme with IF flat rim

These hand-made inset programmes are notable for the pared-down linearity of their design language and the filigree IF flat rim.

BLANCO FLOW-IF – inset and flushmount

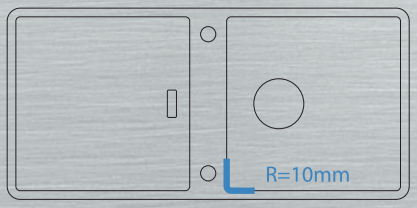

BLANCO FLOW-IF appeals for the flowing transitions in an exceptional, symmetrical design. Draining surfaces, tapered on both sides, border the central CLARON bowl.

BLANCO JARON-IF – inset and flushmount

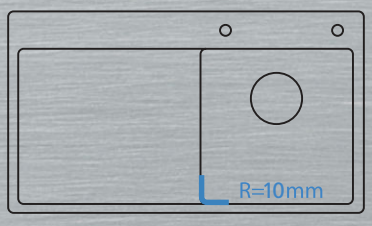

The inset sink BLANCO JARON appeals for its clear, balanced design. The two symmetrical areas with bowl and drainer are elegantly connected to each other by the tap ledge in the middle.

BLANCO CLARON-IF – inset and flushmount

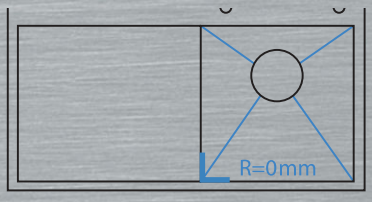

The inset family appeals for the striking corner radii of 10 mm and the IF flat rim. The innovative draining surface blends smoothly with the sink for superb contours.

BLANCO ZEROX-IF – inset and flushmount

The zero radius inset family with the striking X. Visually appealing: the right-angled drainer emphasises the exclusive appearance of these hand-made designs.

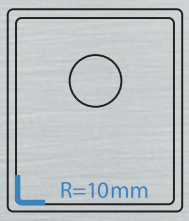

Bowls and sinks for undermount, inset and flushmount installation

Two bowl lines with a consistency of design that sets new standards: BLANCO ZEROX and BLANCO CLARON in a clear design language.

BLANCO CLARON – undermount, inset and flushmount

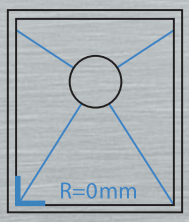

The sink programme with the striking high-tech bowl radii of just 10 mm. The small radii and special depth of the bowl provide for perfect space utilisation.

BLANCO ZEROX – undermount, inset and flushmount

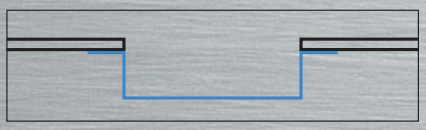

The sink programme in the striking, right-angled zero radius design. Visual feature: the base of the bowl forms an X, emphasising the linearity of the sink geometry.

ARGENTO Handmade Kitchen Sinks

Machines are known for their precision and speed, but the human touch brings an aspect of quality, sophistication and attentiveness to any task. It is this extra consideration that comes through in Häfele's Range of Handmade Argento Kitchen Sinks. Every sink from this range is a product of meticulous guidance, crafted through the process of manual welding. They come in various sizes and configurations to meet individual requirements and design preferences of every user.

All Argento sinks are made of Stainless Steel Grade 304 which by virtue grants them extraordinary durability and unbeatable performance, and lowers the chances of corrosion and rusting. This along with the Asphalt coating of the sink base adds an extra layer of protection and prevents any condensation and corrosion. The inherent aseptic property of Stainless Steel makes the surface of the sinks hygienic and easy to clean after the many varied chores of the day.

These sinks come with extra deep bowls to accommodate even large vessels comfortably. Accomplishing tasks at the sink is also quieter, thanks to the sound suppression pads that absorb noise caused by utensils during the process of washing them. With an elegant European Satin Finish, the sinks blend in seamlessly with the overall aesthetics of your kitchen and come with a warranty of 10 years.

Features

Finish: All Argento sinks come with a uniform European Satin Finish that aesthetically enhances the elegant design of the sink bowl.

Steel Thickness: These sinks are made of Stainless Steel grade 304 with a thickness of 1.2 mm. SS Grade 304 contains 18% Chrome and 8% Nickel which increases the resistance of the material to corrosion and rusting; providing extraordinary durability and unbeatable performance.

Coating: To avoid sound, the undercoat is extremely important for any Stainless Steel sink. The sinks from this range are coated to about 0.5 – 0.8 mm thickness with Asphalt - a material which absorbs sound and protects the base of the sink from condensation and corrosion.

Sound Deadening Pad: In addition to the Asphalt coating, a special sound suppression pad of 2mm thickness is integrated into the Argento sinks to absorb excessive noise of the utensils while washing.

Features

Drain Kit: These sinks come with a drain kit which is especially designed to prevent clogging and ensure easy cleaning.

Overflow Hole: Argento Sinks also have a overflow hole that prevents accumulation of water or overflowing onto the kitchen countertop and the floor during washing and cleaning tasks.

Easy to Clean: The inherent aseptic property of stainless steel makes the maintenance of the sinks virtually effortless. They are hygienic and easy to clean.

Extra Deep Bowl: The Argento Sinks come with extra deep bowls making it sufficiently easy to accommodate large and heavy-duty vessels for cleaning.

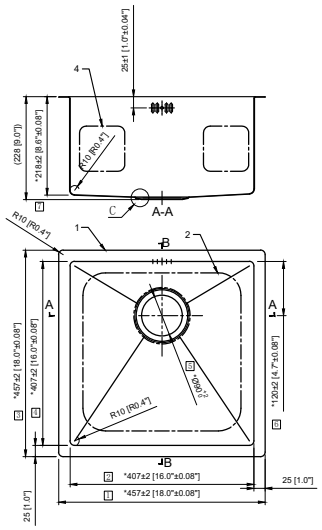

10 Year Warranty: All ARGENTO sinks are guaranteed for 10 years* against faulty workmanship and material. T&C Apply

SPLASH
Punch Bowl Kitchen Sinks

The Splash Kitchen Sinks by Hafele are carefully engineered through a unique drawing process where pressure is individually controlled in combination with a lubrication process which draws out the sink bowls from a Grade 304 Stainless Steel sheet, without the steel itself breaking. The stainless steel sinks are then coated with an elegant satin finish to add a layer of protection against scratching or rusting. The grade 304 composition of Stainless Steel with 18% Chromium & 8% Nickel further enhances the durability of our sinks, making them highly tolerant to humid conditions

Additionally, these sinks are tested to resist any external damages like chipping, cracking or peeling and the hygienic and aseptic properties of stainless steel make the maintenance virtually effortless!The well rounded shape of the Splash sinks also makes way for easy cleaning, eliminating the chances of any unwanted residues accumulating in the remote corners of the sink bowl.

With extra deep bowl depths, these sinks make the washing of heavy-duty vessels an effortless task. The Splash Range of Sinks comes with a special stone guard undercoating and rubber padding to absorb excessive noise levels of utensils during use. All sinks from the this series come with a 10 year warranty against faulty workmanship and material.

FEATURES

Corrosion-Resistant:
Häfele's range of SPLASH sinks are made up of 1mm Stainless Steel Grade 304 which makes them highly durable and resistant to corrosion

Contemporary Finish:
These sinks come with a premium Satin Finish which not only exudes elegance but also provides scratch resistance.

Reduces Noise Levels:
The Splash sinks are padded and Stone-Guard undercoated resulting in reduced noise levels when they are in use

Huge Capacity:
Häfele's Range of SPLASH Sinks, with extra deep bowl depths, can easily accommodate heavy vessels during any cleaning cycle

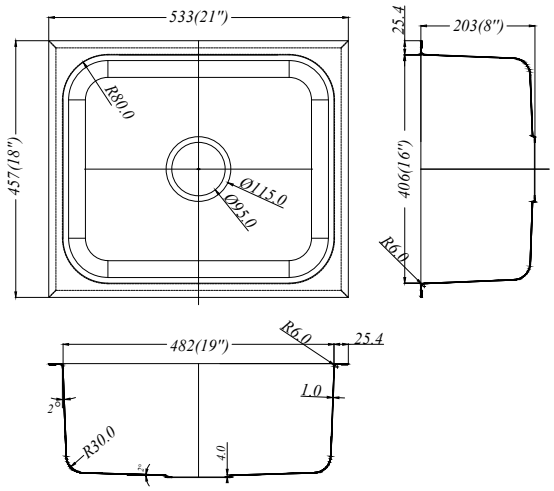

Versatile Drain System:
The drain outlet is compatible with most garbage disposals available in the market. It comes with a stainless steel strainer and a plastic drainage pipe.

Comprehensive Packaging:
These sinks come in an all-inclusive, easy-to-carry package equipped with mounting & installation brackets as well as cut-out templates

10 Year Warranty:
Häfele offers a 10-years* warranty on its Splash range against faulty workmanship and manufacturing defect from the date of invoice. **T&C Apply**

Maintenance Tips

- Frequent and regular cleaning – keep the sink clean and dry when not in use
- Keep the sink free from any standing water at all possible times
- Avoid the accumulation of water high in iron content as it can leave brown stains on the sink surface
- Remove the Lacquer sheet only after installation

Things that can harm your sinks

- Do not allow any mineral deposits
- Do not use steel wool or abrasive pads to clean your sink
- Do not leave rubber dish mats, wet sponges or cleaning pads in the sink overnight
- Do not use the sink as a cutting surface or cutting board
- Do not allow ordinary or white cement to deposit on the sink after installation
- Do not use household products, cleaning products, bleach or leave food which contains chlorine, sulphuric / hydrochloric acid as they are potentially harmful to your sink
- Pickles, mayonnaise, mustard and salt laden food should not be left on /in the sink for a long period.
